

# Proxy-Clean<sup>TM</sup>

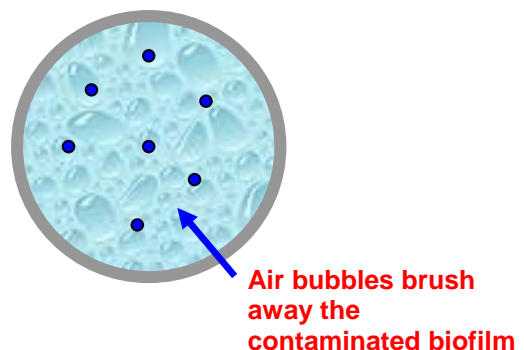

## Our #1 Water Line Cleaner “Why It Works...”

- ✓ Proxy-clean uses 50% hydrogen peroxide enriched with a special silver complex which is stabilized to clean your farm drinking system
- ✓ Deposits from minerals such as iron, medications, vaccines and other additives will cause biofilms to build up in your drinking system
- ✓ When Proxy-clean meets biofilms, its powerful oxidation properties will clean your water lines
- ✓ For best results, Proxy-clean needs to be retained in your drinking system for a minimum of 12 hours

### Treated with Chlorine

### Treated with Proxy-clean<sup>TM</sup>

# Proxy-Clean™

## Directions for Use

### **Cleaning a non-operating system (no birds or animals present)**

Depending on the degree of pollution:

Introduce a 0.8 – 3% solution of Proxy-Clean in the system.

Make sure there is **adequate air release** out of the system!

Allow the system to stand full for a minimum of 12 hours at 3% or 48 hours at 0.8%

### **Cleaning an operating system (birds or animals present)**

Mix Proxy-Clean with water to the following stock solution/premix:

Pump	Stock Solution	Day 1 & 2	Day 3 & 4	Day 5 & 6	Day 7 to 10
		Proxy-clean	Proxy-clean	Proxy-clean	Proxy-clean
1:100	20 litres	200ml	300ml	400ml	500ml

CAUTION: If your system contains algae, you have to destroy them first with chlorine before using Proxy-Clean.

### **Conditioning the drinking system (birds or animals present)**

Mix Proxy-Clean with water to the following stock solution:

Pump	Stock Solution	For 24 hours
		Proxy-clean
1:100	20 litres	200 ml

At least once a week

Always after addition of vaccines, medication or additives

Before conditioning your system, you must have cleaned your system first!

### **Benefits of Proxy-Clean**

- ☐ Removes organic deposits that create biofilm
- ☐ Non-corrosive in solution
- ☐ Bio-degradable
