

Versatile and effective in the fight against darkling beetles

Credo® SC insecticide is a concentrated liquid insecticide for control of lesser mealworm (darkling beetle) larvae and adults in poultry facilities. As part of Envu's darkling beetle control product lineup, Credo is a Group 4 insecticide and may be rotated with Tempo® or Annihilator PolyZone® (Group 3) as part of an integrated pest management program.

Easy to measure and mix liquid concentrate

- Eliminates the need for constant agitation and spray nozzle clogging concerns

Versatile

- Credo SC may be used as a broadcast, band, spot or crack/crevice treatment to floors, walls and support beams within poultry facilities
- Effective, single dose application between flocks provides control that lasts through the grow-out cycle*

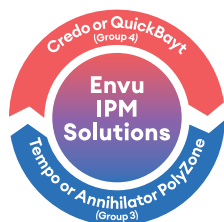

Cost effective

- Concentrated formula means a small volume of product goes a long way
- Just one 500 mL container will treat approximately 555 m²

Application information

- Dilute 90 mL of Credo concentrate into 2–7.5 L of water to treat 100 m²**

Pest controlled	Lifestage	Poultry houses – premise application
Darkling beetles	Adult	Yes
	Larvae	Yes

Envu Integrated Pest Management (IPM) Solutions

Rotate Credo SC (Group 4) with Tempo 20 WP (Group 3) or Annihilator PolyZone (Group 3) to maximize efficacy and reduce the risk of development of resistant pests. Add QuickBayt® to control flies as needed.

* In susceptible populations

** The quantity of liquid varies depending on application method and surface to be treated.

Use sufficient water to obtain a mixture that will provide effective coverage but not require excessive drying time.
