

MEDI-DART

DOUBLE BARREL PROJECTILE SYRINGE

MEDICATING CATTLE MADE EASY

- ✓ **Treat Cattle Safely at a Distance:**
Delivers up to 27cc of medication from 20-30 feet, reducing stress on both livestock and handlers.
- ✓ **Self-Ejecting Dart:**
After injection, the syringe automatically ejects, minimizing animal irritation and allowing fast recovery.
- ✓ **Reusable & Cost-Effective:**
Unlike single-use darts, the Medi-Dart syringe are fully reusable, offering significant cost savings over time.
- ✓ **No Chutes or Corrals Required:**
Perfect for pastured animals, hard-to-catch cattle, or herds with minimal infrastructure.

TREAT CATTLE
WITHOUT A CHUTE,
ON THE SPOT,
STRESS-FREE,
AND AT 30'

NEW IMPROVED SYSTEM

FASTER TREATMENT

BETTER OUTCOMES

LESS HASSLE

Why Use Medi-Dart?

Whether you're dealing with pneumonia, pinkeye, or other treatable conditions, Medi-Dart lets you treat sick cattle immediately, right in the field. It saves time, lowers labour costs, and avoids the stress and risk of gathering animals into a chute, reducing injury risk to both humans and livestock.

Testimonial

“ I just wanted to let you know that after reading the directions and testing the crossbow on a big bale of hay I went to try it out on cows. We had several cows limping in a pasture without corrals. I was so happy when the Medi-Darts worked exactly as described and automatically ejected itself from the cows after the antibiotic had been injected. We are looking for others to doctor now since it is so easy and actually fun! ”
