Single animal scales

mobile

Tight weight references for fattening pigs demand better sorting. Best possible proceeds from the sale of slaughter pigs are only achieved by weighing animals individually. The mobile scales for individual animals are specially designed for sorting slaughter pigs. Main focus is on a comfortable and efficient weighing process with intuitive sorting function.

In brief:

- Flexible use inside and in front of the box
- Determine best possible weight for sales
- Lightweight aluminium construction
- Repel function
- The original - 3 year warranty
- Sorting reference with 4-colour-function on the weighing display

Mobile animal scales Type WA21

Standard dimensions

L x B x H (m)

Outer dimensions:
1.75 x 0.58 x 1.26

Inner dimensions:
1.42 x 0.47 x 0.8

Weight 53 kg

**Weighing range up
to 1,000 kg**

Other dimensions and types on request.

Performance in detail

Three small wheels ensure extreme mobility and manoeuvrability inside stables. Whether pushing like a wheelbarrow, turning on the spot or upright transport - everything is possible. With a total width of 58 cm it can be used even in narrow aisles.

- Waterproof encapsulated weighing cells.
- Pigs like to enter the scales due to extremely low access height of only 7 cm.
- Free passage for user.
- Power supply via built-in rechargeable battery.
- Cable routing inside the rails prevents damages caused by rodents.
- Easy cleaning due to smooth surfaces and only few edges.
- Laterally closed bright walls and an open view in running direction prevent distraction of animals and thus accelerate the weighing process. PATENT no. 10115555.
- Robust and impact-resistant weighing bars. This is why we grant 3 year warranty on the entire scales.

"Since I started weighing with the individual animal scales, I earn €18,000 more every year for the 9,000 pigs I sell"

Pig farmer Hilmar Brandt from Lindau, Barntrup, Germany

Profit from weighing

Profits from weighing Sale of 100 finishing pigs

	without scales	with scales
Ø loss through over- and under-weighing	€3.72/animal* 372 €/batch	€1.23/animal* €123/batch
Profit Weighing		€249/batch
Minus remuneration Weighing: 1h/batch		€ -50 /batch
Extra profit		€199 /batch

*Source: Westfalen Producers' Association
Profit based on individual animals
= €1.99/animal.
For 2,000 fattened pigs/year
= €3.960 profit/year

Repel function
- only available from us -

Registered design
Nr. 20 2009 003 5166

SIMPLY INGENUOUS

Practical „remote control“ for two functions; easy to reset:

- Pigs passing through: Open and close the front gate via a lever in the rear. Herd the animals through without having to move!
- Pigs coming back: Move the reverse herding flap to the opposite side to bring the pigs back. Herd the animals back around without having to move!

4-position holder for color spray, secure hold even during vertical transport
