

ROBSON - TXRAP418 - Product code: 914320
BLACK FRAME - POLARIZED AQUA PRECISION BLUE MIRROR LENS

Outstanding Polarized glasses ideal for reducing "snow-blindness", or people who have a high sensitivity to light, or spend time on the water!

DESCRIPTION **CSA Z94.3 RATED**

The Edge Robson is for those who need an impact-rated glass, but won't compromise on quality or features. It's as stylish as it is protective, and comes with smart frame details that render it comfortable enough for every weekday, and each weekend.

LENS DESCRIPTION

Polarized Aqua Precision Blue Mirror Lens maximize visual clarity and contrast in bright light conditions. Rather than using a layering process, anti-reflective ions are infused into a blue-colored mirror to reflect light. The addition of a polarizing filter results in the greatest reduction of glare.

FEATURES

- Frame constructed of flexible, durable nylon composite
- Wraparound frame for improved peripheral vision and protection
- Thermoplastic rubber (TPR) adjustable nosepiece and temple details
- Lenses block 99.9% of UVA/UVB/UVC rays
